Procedures for connections

SQUARE MANIGLIONE is connected to the electric power supply with a concealed connection, therefore a flexible ducting with max. 13 mm diameter is needed to pass through the electric wires (not supplied). The exit position of the flexible ducting is indicated in the technical diagram with the symbol "•". To turn the electric "maniglione" on and off we recommend you install an on/off switch (not supplied). For further details see the tecnical chart here below.
