

This suspended light fitting delivers 360° of luminous flux. Powered up, it will enhance your interior by giving new meaning to its volume. Powered down, its presence will bring your living space to life with its infinite play of reflections. This suspended LED light fitting offers two completely original lighting effects. Powered down, it reflects its surrounding environment using the first - colourless - mirror-effect film. Powered up, the second - translucent - film reveals the full transparency of the product and creates a kaleidoscopic multitude of glittering prisms. This luminaire is supplied ready to install, fully equipped with its cable, light source and wall cable plate. All our luminaires are manufactured, assembled and packaged at our Châtillon-sur-Saône factory plant in the Vosges region of France.

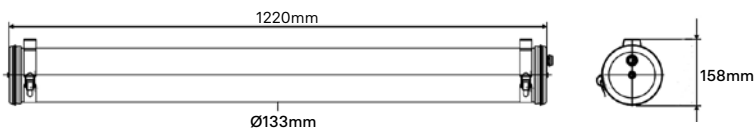

Characteristics

CLI - 220V - LED Module 74W 2700K
 Diameter : 133mm
 Length : 1220mm
 Weight : 4kg
 Installation : Wall / Ceiling / Pendant

Protection sign : IP68
 Equipped with cable and cable plate kit
 Suspension ropes : 2 x 3m included
 Cable : 3m
 Design : Yann Kersalé

Finish

Stainless steel

Materials

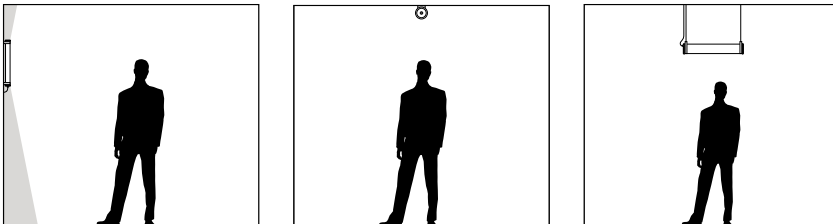

End caps & fixing straps : Stainless steel 316 L
 Body : Coextruded PMMA/PO
 One-way mirror and prismatic films
 Braided tinned copper cable

Gaskets : EPDM
